

Indoors:

DO wipe your feet and/or take your shoes off at the door and leave them outside, if possible.

DO wash your hands after gardening, playing outdoors, or doing other messy things.

DO vacuum frequently, and only use a HEPA* vacuum.

*High Efficiency Particulate Air

13

DO call the *Asbestos Resource Program (ARP)* if you see ANY vermiculite on your property **Libby (406) 291-5335**.

If you are unsure about material you are bringing onto your property, call the ARP to have it sampled first.

DON'T bring dusty or dirty things inside.

DO keep your pets clean.

DO use a HEPA vacuum to remove dust from clothing, furniture, drapes, etc.

Photo of raw (left) and processed (right) vermiculite. View samples at the EPA Info Center.

Don't let an unwanted visitor into your home!!

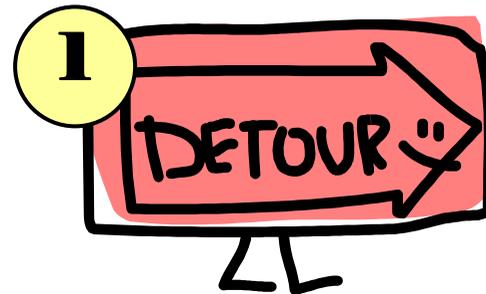

13 simple steps to protect yourself and your loved ones from **Libby Amphibole Asbestos (LA)**

Reducing contact with disturbed, contaminated soil is important in reducing your exposure to LA. LA poses the greatest threat when it is airborne.

For a lower risk of exposure, focus on keeping contaminated soil from being disturbed in your yard and trapped in your home.

This flyer gives some common sense tips on avoiding exposure to LA on your property.

Outdoors:

DON'T disturb areas where you can see vermiculite (*see picture on back*). Find other places to play or garden.

DO water often. A healthy lawn reduces dust and contact with bare soil.

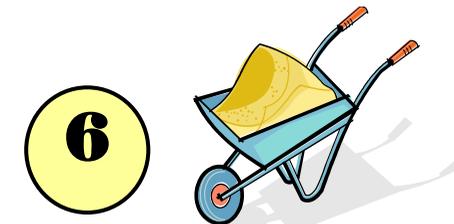

DO mow your lawn when it's damp – not when it's dry and dusty.

DON'T dig, cultivate, or roto-till your garden soil when it is dry and dusty, and do suppress any dust with water.

DO rinse off gardening tools outside.

DON'T buy or accept free topsoil or fill from an unknown source. If you are unsure, call the ARP.
